[Wakatu Incorporation Annual Report 2016](#)

The municipality of Lemvig is challenged by a declining population as the youth are seeking the larger cities when looking for education. It is therefore of interest to the municipality to cater for the youth and offer them a unique lifestyle which the larger cities cannot. Lemvig Municipality is known for its ingenuity and it is important that Lemvig Municipality is appealing for start-ups and that the municipality supports its industry and helps create growth in a way that attracts the youth.

Together with the Climatorium, Lemvig Municipality wants to offer the youth new opportunities and modern facilities which makes it possible to study from satellite-offices. Climatorium also opens up for new start-up opportunities which arise from the many quadruple helix projects with a natural gateway to the international market.

2.2.6 Central Denmark Region

Central Denmark Region is one of five Danish regions. The region covers an area of 13,000 square kilometres, includes 19 municipalities and has 1.3 million citizens, which is equivalent to 23% of the total Danish population. The region has a broad business life with many small and medium-sized production companies, strong creative businesses and a flourishing tourism industry. Central Denmark Region is the home of many global market leaders such as Grundfos, Vestas, Siemens Wind Power and Arla Foods giving the region strong positions within green energy, water technology and food production.

Central Denmark Region is led by a Regional Council, consisting of 41 politicians elected every four years. The ambition of the Regional Council is to be an attractive and sustainable region and the region wishes to contribute to and promote solutions to major challenges both nationally and globally. To fulfil these ambitions, it is important to build strong partnerships with knowledge institutions, private and public companies as well as organisations both regionally, nationally and internationally, and to engage in more partnerships to find new solutions to emerging challenges.

The Regional Council has decided that the UN Sustainable Development Goals will be the strategic frame for development in Central Denmark Region from 2019 and onwards. The goals shall ensure that the region's development activities locally, regionally and internationally are also relevant in a global perspective.

Central Denmark Region wants to take care of climate, environment and resources to ensure a sustainable development. Climate changes will lead to more and heavier rain, ocean levels and temperatures will rise. The challenges must be solved by different kinds of climate adjustments. The challenges crossing both local and national borders require solutions where we pull together in strong partnerships such as Coast to Coast Climate Challenge.

Central Denmark Region is in the frontline concerning competencies in and knowledge of soil contamination. The region's main task is to identify, investigate and remediate any soil contamination that poses a risk for human health, the groundwater or the environment. At Harboere Tange in Lemvig Municipality, Central Denmark Region is managing one of the most contaminated areas in Denmark. Currently, the region collaborates with clean-tech companies with the aim of developing new remediation technologies.

Raw materials are scarce all over the world. A new Ice Age would be the only way to get new raw materials to Central Denmark Region, so it is necessary to intensify our focus on
